Subject Index

Artificial Intelligence
Artificial Intelligence Applied to Manufacturing. *Mayer, Ric.* Fall 1985, 25–29.
Artificial Intelligence in a Nutshell . . . and Its Implication for Manufacturing. *Liu, David.* Winter 1988, 7–14.
Can Artificial Intelligence Techniques Reduce Programming Complexity? *Taylor, William H.* Spring 1986, 7–11.
Low-Cost Artificial Intelligence Can Aid Design and Simulation. *Mackulak, Gerald, and Cochran, Jeffrey.* Spring 1987, 33–36.
MADEMA: An Approach to Intelligent Manufacturing Systems. *Chryssolouris, George.* Spring 1987, 11–17.
Manufacturing with Intelligence. *Schnur, Joel A.* Spring 1987, 3–5.
Object-Oriented Programming: A New Approach for Automatic Factories. *Taylor, William A.* Summer 1986, 55–58.
Projected Technology Trends. *Wisnosky, Dennis E.* Fall 1985, 3–9.
Technology Transfer, Knowledge Engineering, and CIM. *Geisel, Larry K.* Spring 1987, 6–10.
Why AI Has Not Made a Splash in Manufacturing. *Liu, David.* Spring 1987, 59–60.

CAD/CAM Systems
CAD/CAM Data Exchange. *Smith, Philip.* Winter 1990, 30–33.
A Case Study in Successful CAD/CAM Justification. *Van Nostrand, R.C.* Fall 1984, 45–52.
Feature Technology: A Key to Manufacturing Integration. *Brimson, James A., and Downey, Peter J.* Spring 1986, 21–27.
Integrating CAD and MRP II Systems. *Bohse, Michael E., and Harhalakis, George.* Summer 1987, 7–14.
Managing Bill of Material and CAD/CAM Data. *Schmuland, Rodney.* Winter 1986, 46–54.
MRP II and CAD Are a Foundation for CIM Systems. *Harhalakis, George; Mark, Leo; Johri, Anshuman; and Cochrane, Bobbie.* Fall 1988, 14–24.
Solid Modeling: Can You Afford to Wait? *Johnson, Robert H.* Fall 1984, 25–29.
A User's Perspective on CAD/CAM and MIS Integration. *Van Nostrand, Ronald.* Winter 1986, 38–45.

Case Studies
Assessing the Feasibility of an Automated Testing System: A Case Study. *Fox, Herbert, and Weiner, Joel.* Spring 1986, 41–52.
A Case Study in Data Base Integration. *Lew, Winnie, and Machmiller, Patricia.* Winter 1985, 41–48.
A Case Study in Software Systems Integration. *Chappell, Terry.* Spring 1985, 45–51.
A Case Study in Successful CAD/CAM Justification. *Van Nostrand, R.C.* Fall 1984, 45–52.

A Case Study of Shop Floor System Evolution. *Best, James D.* Summer 1985, 36–44.
A Case Study on Implementing a CIM System: L'eggs Products Inc. *McKenzie, Phillip E.* Spring 1989, 19–23.
A Case Study on Integrating Job Redesign and CIM: International Biosynthetics Inc. *Hettenhaus, James R.* Spring 1989, 13–18.
A CIM Showcase: Motorola's Bandit Plant. *Sykes, Charles.* Spring 1989, 31–34.
The FMS—A Stepping Stone to CIM. *Merchant, M. Eugene.* Spring 1985, 3–7.
Implementing Computer-Aided Process Planning: Rockwell International Case Study. *Stroheimer, Arthur H.* Fall 1987, 34–41.
Logistics Efficiency—Product Design and Process Requirements. *Mather, Hal.* Winter 1986, 16–20.
MRP II as the Cornerstone of CIM Strategy: Systems Development Corporation Case Study. *Pennente, Ernest A.* Summer 1987, 29–34.
MRP II Paves the Road to Computerized Planning Systems. *Richardson, John R.* Winter 1988, 15–19.
A Proven Approach to CIM Systems Design and Planning. *Lapen, Robert J., and Jeffrey, Robert J.* Summer 1986, 36–48.
Using Simulation to Upgrade a Warehouse Control System: TI Case Study. *Bradshaw, Wesley W. (Brad).* Winter 1987, 33–41.
What Lies Below the Tip of the Iceberg? *Nagel, Roger N.* Fall 1984, 30–34.

CIM Concepts

Achieving CIM Through Mastery of the Basics. *Miller, Robert D.* Spring 1987, 43–46.
The Architecture of CIM for the Discrete Part Manufacturing Enterprise. *Computer Aided Manufacturing International Inc.* Fall 1988, 7–13.
The Canadian Government Alone Cannot Implement CIM. *Richardson, John.* Spring 1988, 41–44.
A Case Study on Implementing a CIM System: L'eggs Products Inc. *McKenzie, Phillip E.* Spring 1989, 19–23.
A Case Study on Integrating Job Redesign and CIM: International BioSynthetics Inc. *Hettenhaus, James R.* Spring 1989, 13–18.
The Challenge and the Rewards. *Michel, Frederick J.* Winter 1989, 57–61.
The Challenge of CIM Implementation Is 80% Organizational. *Savage, Charles M.* Spring 1988, 54–60.
CIM and Logistics: A European Study. *de Vaan, Mathias.* Summer 1990, 45–52.
CIM Architecture: A Lasting Impression. *Schnur, Joel A.* Fall 1988, 3–6.
CIM from a Top Management Perspective. *Weston, F.C., Jr.* Winter 1989, 18–22.

Coming to Terms with CIM. *Wisnosky, Dennis E.* Fall 1984, 4–5.
Dispelling Myths About CIM Planning and Implementation. *Shunk, Dan L.* Winter 1985, 24–28.
The Elements of CIM: The Role of Information. *Gibbons, Albert J.* Winter 1989, 8–17.
The Evolution of CAD/CAM in Canada. *Scrimgeour, Jack.* Fall 1987, 48–52.
The Function and Activity Structure in a CIM Architecture. *Computer Aided Manufacturing-International Inc.* Spring 1989, 52–56.
How to Avoid the Worst CIM Planning Traps. *Derks, Richard P.* Fall 1988, 55–60.
The Human Impact of the CIM Decision. *Billo, Richard E., and Paul, Brian K.* Fall 1988, 37–42.
Information Structure in a CIM Architecture. *Computer Aided Manufacturing-International Inc.* Summer 1989, 41–45.
Integration: A Critical Element in the CIM Equation. *Romanosky, Jack.* Winter 1988, 53–54.
Interorganizational CIM. *Appleton, Daniel S.* Summer 1987, 54–57.
Interorganizational CIM. *Appleton, Daniel S.* Winter 1987, 6–8.
Is It Just CIMagination? *Schnur, Joel.* Summer 1986, 3–5.
Main Components of a CIM Reference Model. *Cohen, Gideon.* Winter 1988, 28–36.
The Management Structure in a CIM Architecture. *Computer Aided Manufacturing-International Inc.* Winter 1989, 39–45.
The Marriage of Asset Management and CIM Technology. *Appleton, Daniel S.* Winter 1986, 3–7.
The Payoff of CIM. *Rasmussen, Arne P.* Winter 1989, 62–64.
Physical Structure in CIM Architecture. *Computer Aided Manufacturing-International Inc.* Spring 1990, 34–37.
Profiting Through Producibility. *Schnur, Joel A.* Winter 1989, 3–7.
Putting ABCs of Information Systems Ahead of CIM. *Shah, Shashi.* Spring 1989, 46–51.
The Soft-Side Issues of CIM. *Cooper, Jeffrey H.* Spring 1988, 23–24.
Standards for Manufacturing Information Models. *Parks, Curtis H.* Fall 1988, 25–28.
The State of IBM's CIM Architecture. *Munsinger, John P.* Spring 1990, 30–33.

Communications

A Case Study on Integrating Job Redesign and CIM: International BioSynthetics Inc. *Hettenhaus, James R.* Spring 1989, 13–18.
Command, Control, and Communication Technology and the Business Environment. *Serio,*

Louis E., Jr. Fall 1989, 21–26.
Critical Issues in Integrating Factory Automation Systems. *Odrey, Nicholas, and Nagel, Roger.* Winter 1986, 29–37.
Customers Can't Wait for CIM Communications Standards. *Schnur, Joel A.* Spring 1990, 3–4.
The Elements of CIM: The Role of Information. *Gibbons, Albert J.* Winter 1989, 8–17.
The Factory Floor Network. *Zailyk, Stephen T.* Summer 1989, 35–40.
How to Wait for CIM Communications Standards. *McCarthy, J.J.* Spring 1990, 38–40.
Human Resources Are Key to Improving Productivity. *Unterweger, Peter.* Fall 1988, 29–36.
Information Technology at Texas Instruments. *White, John W.* Winter 1991, 5–10.
The Importance of Information Systems Analysis for Manufacturing Operations. *Hosseini, Jinnoos.* Spring 1989, 43–45.
Object-Oriented Programming: A New Approach for Automatic Factories. *Taylor, William A.* Summer 1986, 55–58.
Projected Technology Trends. *Wisnosky, Dennis E.* Fall 1985, 3–9.
Prompt Communication Contributes to Success. *Paul, Brian K.; Cochrane, Jeffery K.; and Shunk, Daniel L.* Summer 1989, 28–34.
Putting ABCs of Information Systems Ahead of CIM. *Shah, Shashi.* Spring 1989, 46–51.
Standards for Manufacturing Information Models. *Parks, Curtis H.* Fall 1988, 25–28.
A Standards Framework for the Computer-Integrated Enterprise. *Gibbons, Albert J.* Spring 1988, 10–17.
Using LANs to Automate the Factory Floor. *Joseph, Celia A.* Summer 1990, 30–41.
Value Control in the CIM Environment. *Tietze, Armin R.* Fall 1988, 43–48.

Computer-Aided Process Planning

Analyzing Process-Plant Information and Control Systems. *McCarthy, J.J.* Winter 1991, 31–44.
Determining the True Cost of Material Handling. *Pendlebury, John, and Platford, Richard.* Winter 1989, 23–27.
Expert Process Planning for Flexible Manufacturing. *Srihari, K., and Greene, Timothy J.* Winter 1990, 43–50.
Hark! The Unheralded Computer-Integrated Distribution Function. *Bennet, Earl D.; Reed, Sarah A.; and Shows, William P.* Winter 1989, 28–38.
Implementing Computer-Aided Process Planning: Rockwell International Case Study. *Stroheimer, Arthur H.* Fall 1987, 34–41.
In Search of Perfect Planning. *Schnur, Joel A.* Fall 1987, 3–6.
An Introduction to Computer-Aided Process Planning. *Allen, Dell K.* Fall 1987, 7–23.
Modifying Work Standards for MRP, GT, and JIT Systems. *Lee, Quarterman.* Fall 1987, 28–33.
A Primer on Quality Function Deployment. *Fortuna, Ronald M.* Fall 1988, 49–54.
Process Planning in the Computer-Integrated Factory. *Tulkoff, Joseph.* Fall 1987, 24–27.
Thinking CAPP. *Granville, Charles S.* Spring 1990, 50–56.
Understanding and Selecting Process Manufacturing Systems. *Thompson, Olin.* Spring 1989, 8–12.
What`s Keeping Industrial Control from Joining the Expert Systems Gold Rush. *Sullivan, Edward.* Spring 1989, 24–30.

Cost Justification

Accounting for Intangibles in CIM Justification. *Putrus, Robert.* Winter 1990, 23–29.
A Case Study in Successful CAD/CAM Justification. *Van Nostrand, R.C.* Fall 1984, 45–52.
Determining the CIM Investment's Eventual Payback. *McIlhattan, Robert D.* Spring 1988, 61–64.
Economics in the Factory of the Future. *Jelinek, Marian, and Goldhar, Joel D.* Winter 1986, 21–28.
The Fresh-Start Approach to CIM Investment Justification. *Storm, David J., and Sullivan, Steven J.* Summer 1990, 53–62.
Justifying CIM: A Quantitative Analysis Tool. *Degraeve, Zeger; Herroelen, Willy; and Lambrecht, Marc.* Fall 1986, 33–43.
Justifying the Purchase of a Coordinate Measuring Machine. *Bosch, John A.* Fall 1989, 45–49.
New Justification Approaches for CIM. *Meredith, Jack.* Spring 1987, 37–42.
ROI for Quality Systems. *Keane, John A.* Summer 1986, 59–63.
Strategic Benefits of Cost Justification. *Noble, Jean L.* Summer 1990, 66–70.
The Struggle for Integration. *Costea, Ileana.* Winter 1990, 9–14.
Uncertainty Modeling in CIM Investment Analysis. *Randhawa, Sabah U., and West, Tom M.* Fall 1989, 32–36.

Cost Management and Accounting

Accounting for Quality Costs—A Critical Component of CIM. *Morse, Wayne J., and Poston, Kay.* Fall 1986, 53–60.
Cost Accounting in the Factory of the Future. *Bonsack, Robert A.* Spring 1986, 28–32.
Cost Management and Performance Measurement Systems. *Bonsack, Robert A.* Summer 1989, 46–49.
Determining the True Cost of Material Handling. *Pendlebury, John, and Platford, Richard.* Winter 1989, 23–27.

Exploiting Manufacturing Systems' Potential to Improve Cost Management. *Lehman, William M.* Winter 1986, 8–11.
How MRP Can Improve Financial Performance. *Deis, Paul.* Fall 1984, 53–58.
How to Make the Case for Maintenance. *Foster, Gerald D., and Van Tran, Hien.* Winter 1990, 51–57.
Indirect Cost Idenfitication and Control. *Ayers, James.* Fall 1985, 58–64.
Integrated Factory Automation: A Cost/Benefit Perspective. *Muir, William T.* Winter 1985, 16–20.
Modernization Projects—What Kind of Tax Analyses Should You Perform? *Hindman, Roger C., and Nystrom, Norman K.* Spring 1985, 16–20.
MRP II and Cost Management: A Match Made in Theory? *Anderson, Alan D., and Ostrenga, Michael R.* Summer 1987, 24–28.
Performance Measurement and Cost Management: Labor's Loss or Management's Gain? *Muir, William T.* Winter 1987, 56–60.
Practical Accounting Advice for Just-in-Time Production. *Holbrook, William.* Winter 1985, 49–54.
Taking a Hard Look at Cost Management and CIM. *Schnur, Joel A.* Fall 1986, 3–4.
Technology Accounting—The Value-Added Approach to Capital Asset Depreciation. *Brimson, James A., and Frescoln, Leonard D.* Fall 1986, 44–52.
Value Control in the CIM Environment. *Tietze, Armin R.* Fall 1988, 43–48.

Data Base Management

Assignment: Orchestrating the CIM Data Base. *Johnson, Robert H.* Summer 1985, 8–12.
Bridging the Data Base Islands at Hughes Aircraft. *Veronica, James A., Jr.* Fall 1990, 16–22.
A Case Study in Data Base Integration. *Lew, Winnie, and Machmiller, Patricia.* Winter 1985, 41–48.
Critical Issues in Integrating Factory Automation Systems. *Odrey, Nicholas, and Nagel, Roger.* Winter 1986, 29–37.
Data Base Implementation for the Next Generation of CIM Systems. *Marks, Peter.* Fall 1987, 42–47.
Data Base Management: The Next Generation. *Everest, Gordon C.* Fall 1990, 31–43.
Managing Bill of Material and CAD/CAM Data. *Schmuland, Rodney.* Winter 1986, 46–53.
Relational and Object-Oriented: Understanding the Data Base Debate. *Gomsi, Jeff, and DeSanti, Mike.* Fall 1990, 23–30.
Standards for Manufacturing Information Models. *Parks, Curtis H.* Fall 1988, 25–28.
Value Control in the CIM Environment. *Tietze, Armin R.* Fall 1988, 43–48.
What's All the Hubbub About Data? *Appelton, Daniel S.* Fall 1984, 35–37.
Who Owns the Data? *Weldon, Jay-Louise.* Spring 1986, 12–15.

Decision Support Systems

Artificial Intelligence in a Nutshell . . . and Its Implication for Manufacturing. *Liu, David.* Winter 1988, 7–14.
Assessing Corporate Competitiveness with Product Profitability Analysis. *Santori, Peter R.* Winter 1988, 37–42.
Automated Reasoning to Obtain Flexible Systems Architectures. *Cohen, Gideon.* Winter 1989, 46–56.
CIM Requires Bold Leadership. *Schnur, Joel A.* Spring 1989, 3–7.
Hark! The Unheralded Computer-Integrated Distribution Function. *Bennett, Earl D.; Reed, Sarah A.; and Shows, William P.* Winter 1989, 28–38.
The Importance of Information Systems Analysis for Manufacturing Operations. *Hosseini, Jinoos.* Spring 1989, 43–45.
Manageable Steps to Factory Automation. *Viola, Michael R.* Spring 1989, 57–59.
The Payoff of CIM. *Rasmussen, Arne P.* Winter 1989, 62–64.
A Primer on Quality Function Deployment. *Fortuna, Ronald M.* Fall 1988, 49=54.
Putting ABCs of Information Systems Ahead of CIM. *Shah, Shashi.* Spring 1989, 46–51.
Report for Management: Decision Support Tools. *Mayer, Ric.* Winter 1985, 55–63.
Value Control in the CIM Environment. *Tietze, Armin R.* Fall 1988, 43–48.

Expert Systems

Artificial Intelligence Applied to Manufacturing. *Mayer, Ric.* Fall 1985, 25–29.
Beyond CIM: Computer-Optimized Manufacturing. *Hess, George J.* Summer 1990, 6–16.
Expert Process Planning for Flexible Manufacturing. *Srihari, K., and Greene, Timothy J.* Winter 1990, 43–50.
Expert Process Planning in Real Time. *Srihari, K.; Emerson, C. Robert; and Cecil, Joe Amal.* Winter 1991, 23–30.
Expert Systems Come of Age. *Schwartz, Tom J.* Spring 1987, 18–28.
Getting Started with Expert Systems. *Colgrove, Dean W.* Spring 1987, 29–32.
Information Technology at Texas Instruments. *White, John W.* Winter 1991, 5–10.
Integrating Expert Systems with Process Manufacturing. *Kaemmerer, William F.; Adams, James S.; and Stipe, Charles D.* Winter 1991, 11–22.
A Pragmatic Guide to Industrial Expert Systems Implementation. *Taylor, William.* Winter 1986, 55–63.

What's Keeping Industrial Control from Joining the Expert Systems Gold Rush. *Sullivan, Edward.* Spring 1989, 24–30.

Facilities Planning

Assuring the Quality of Automation Equipment: A Quality Assurance Perspective. *Joyner, William E.* Summer 1988, 19–21.

Automated Reasoning to Obtain Flexible Systems Architectures. *Cohen, Gideon.* Winter 1989, 46–56.

CIM from a Top Management Perspective. *Weston, F.C., Jr.* Winter 1989, 18–22.

A CIM Showcase: Motorola's Bandit Plant. *Sykes, Charles.* Spring 1989, 31–34.

Computer-Aided Process Planning—A CAD/CAM Interface. *Srihari, K., and Green, Timothy J.* Summer 1988, 47–54.

The Elements of CIM: The Role of Information. *Gibbons, Albert J.* Winter 1989, 8–17.

The Function and Activity Structure in a CIM Architecture. *Computer Aided Manufacturing-International Inc.* Spring 1989, 52–56.

Hark! The Unheralded Computer-Integrated Distribution Function. *Bennett, Earl D.; Reed, Sarah A.; and Shows, William P.* Winter 1989, 28–38.

How to Avoid the Worst CIM Planning Traps. *Derks, Richard P.* Fall 1988, 55–60.

Implementation of Factory Automation Equipment: A Quality Assurance Perspective. *Joyner, William E.* Winter 1988, 43–45.

Integration Through Simplification: Rethinking Plan Layout and Machine Changeover. *Mather, Hal.* Summer 1985, 13–17.

Laser-Based Robotic Systems for Manufacturing Automation. *Ray, Asok, and Watson, Henry.* Summer 1988, 40–46.

Manageable Steps to Factory Automation. *Viola, Michael R.* Spring 1989, 57–59.

Messages from an AUTOFACT '88 Study. *Smith, William A., and Michaels, Lawrence T.* Spring 1989, 35–42.

MRP II and CAD Are a Foundation for CIM Systems. *Harhalakis, George; Mark, Leo; Johri, Anshuman; and Cochrane, Bobbie.* Fall 1988, 14–24.

Standards for Manufacturing Information Models. *Parks, Curtis H.* Fall 1988, 25–28.

Financial Planning and Analysis

Anticipating the Full Cost of an NC Investment. *Childs, James J.* Winter 1985, 13–15.

Assessing Corporate Competitiveness with Product Profitability Analyses. *Santori, Peter R.* Winter 1988, 37–42.

Economics in the Factory of the Future. *Jelinek, Mariann, and Goldhar, Joel D.* Winter 1986, 21–28.

Experience Curve Theory: A Technique for Quantifying CIM Benefits. *Baudin, Michel.* Summer 1985, 51–58.

Financial Alternatives for Acquiring Automated Systems. *MacDonald, Deborah.* Spring 1985, 26–36.

Integrated Factory Automation: A Cost/Benefit Perspective. *Muir, William T.* Winter 1985, 16–20.

Modernization Projects—What Kind of Tax Analyses Should You Perform? *Hindman, Roger C., and Nystrom, Norman K.* Spring 1985, 16–20.

Tax Analyses for Government Contractors. *Hindman, Roger C., and Nystrom, Norman K.* Summer 1985, 18–22.

Value Control in the CIM Environment. *Tietze, Armin R.* Fall 1988, 43–48.

Flexible Manufacturing Systems

Adaptive Control Capabilities for FMSs. *Carlisle, Robert V.* Summer 1985, 45–50.

The Appeal of Flexible Manufacturing. *Zisk, Burton I.* Fall 1984, 67–71.

Automated Reasoning to Obtain Flexible Systems Architecture. *Cohen, Gideon.* Winter 1989, 46–56.

Design Team Planning for a Successful FMS. *Ewaldz, Donald E.* Summer 1988, 35–39.

Ensuring the Flexibility of an FMS. *Gould, Lawrence.* Winter 1987, 61–65.

Expert Process Planning for Flexible Manufacturing. *Srihari, K., and Greene, Timothy J.* Winter 1990, 43–50.

The FMS—A Stepping Stone to CIM. *Merchant, M. Eugene.* Spring 1985, 3–7.

Flexible Manufacturing: Past, Present, and Future. *Mittelstadt, Eric.* Spring 1989, 60–62.

A Fully Automated System for Electronic Assembly and Testing. *Dwivedi, Suren N., and Kupic, Joseph.* Summer 1986, 14–25.

Strategic Considerations in the Implementation of Flexible Manufacturing Systems into Computer-Integrated Manufacturing. *Brehm, Thomas A., and Yen, David (Chi-Chung).* Fall 1989, 27–31.

Why Be Flexible First? *Tailor, Kal K.* Spring 1990, 10–14.

Government-Sponsored CIM Programs

Computer Technology: The Next Revolution. *Joseph, Earl C.* Summer 1986, 49–54.

Conference Report: Air Force on Target with CIM Programs. *Peper, Patricia G.* Summer 1985, 59–64.

Group Technology

An Expanding Role for Group Technology. *Ham, Inyong.* Spring 1985, 21–25.

Group Technology: A Foundation for CIM Information Management. *Peterson, David K.; Hyer, Nancy Lea; and Zmud, Robert W.* Winter 1987, 48–55.

Implementing Computer-Aided Process Planning: Rockwell International Case Study. *Stroheimer, Arthur H.* Fall 1987, 34–41.
Modifying Work Standards for MRP, GT, and JIT Systems. *Lee, Quarterman.* Fall 1987, 28–33.

Image Processing
Bringing Image Processing into Focus. *Moody, Gerald H.* Summer 1986, 26–28.

Integration
Beyond CIM: Computer-Optimized Manufacturing. *Hess, George J.* Summer 1990, 6–16.
Engineering Elements of the Paperless Factory. *Strohmeier, Arthur H.* Summer 1989, 16–27.
The State of IBM's CIM Architecture. *Munsinger, John P.* Spring 1990, 30–33.

Japanese Production
A History Lesson: Finding the Fast Track to Better Quality. *Kean, John.* Fall 1985, 19–21.
Japanese Production Planning: A Successful Balancing Act. *McGuire, Kenneth J.* Spring 1985, 59–64.
Toyota Production System—Just in Time, Not Just in Japan. *Leahy, James A.* Fall 1984, 59–66.

Just-In-Time Production
Customer-Supplier Relationships for Just in Time. *O'Neal, Charles.* Spring 1986, 33–40.
Modifying Work Standards for MRP, GT, and JIT Systems. *Lee, Quarterman.* Fall 1987, 28–33.
Practical Accounting Advice for Just-In-Time Production. *Holbrook, William.* Winter 1985, 49–54.
Systems for Supporting the MRP II/JIT Environment. *Rao, Ashok, and Scheraga, David.* Summer 1987, 15–23.
Systems Support of Just-In-Time Manufacturing. *Roberts, John W.* Fall 1989, 6–13.
Toyota Production System—Just in Time, Not Just in Japan. *Leahy, James A.* Fall 1984, 59–66

Machine and Process Controls
Adaptive Control Capabilities for FMSs. *Carlisle, Robert V.* Summer 1985, 45–50.
Anticipating the Full Cost of an NC Investment. *Childs, James J.* Winter 1985, 13–15.
Automated Reasoning to Obtain Flexible Systems Architectures. *Cohen, Gideon.* Winter 1989, 46–56.
Determining the True Cost of Material Handling. *Pendlebury, John, and Platford, Richard.* Winter 1989, 23–27.
A Fully Automated System for Electronic Assembly and Testing. *Swivedi, Suren N., and Kupic, Joseph.* Summer 1986, 14–25.
The Function and Activity Structure in a CIM Architecture. *Computer Aided Manufacturing-International Inc.* Spring 1989, 52–56.
Hark! The Unheralded Computer-Integrated Distribution Function. *Bennett, Earl D.; Reed, Sarah A.; and Shows, William P.* Winter 1989, 28–38.
The Importance of Information Systems Analysis for Manufacturing Operations. *Hosseini, Jinoos.* Spring 1989, 43–45.
Manageable Steps to Factory Automation. *Viola, Michael R.* Spring 1989, 57–59.
A Primer on Quality Function Deployment. *Fortuna, Ronald M.* Fall 1988, 49–54.
Projected Technology Trends. *Wisnosky, Dennis E.* Fall 1985, 3–9.
Understanding and Selecting Process Manufacturing Systems. *Thompson, Olin.* Spring 1989, 8–12.
Using SPC to Become a Quality Manufacturer. *Borden, James.* Summer 1988, 6–18.
What's Keeping Industrial Control from Joining the Expert Systems Gold Rush. *Sullivan, Edward.* Spring 1989, 24–30.

Management Concerns
Achieving CIM Through Mastery of the Basics. *Miller, Robert D.* Spring 1987, 43–46.
A Case Study on Implementing a CIM System: L'eggs Products Inc. *McKenzie, Phillip E.* Spring 1989, 19–23.
A Case Study on Integrating Job Redesign and CIM: International BioSynthetics Inc. *Hettenhaus, James R.* Spring 1989, 13–18.
Caution in Global Markets. *Nycum, Susan.* Winter 1990, 60–63.
CIM Dictates Changes in Management Practice. *Gold, Bela.* Spring 1986, 3–6.
CIM and Beyond: Global Challenges for US Manufacturers. *Young, John A.* Spring 1990, 5–9.
CIM from a Top Management Perspective. *Weston, F.C., Jr.* Winter 1989, 18–22.
CIM Is Not a Spectator Sport. *Schnur, Joel A.* Fall 1990, 3–4.
CIM Planning: The Future-Factory Foundation. *Quantz, Paul.* Fall 1984, 38–44.
CIM Requires Bold Leadership. *Schnur, Joel A.* Spring 1989, 3–7.
A Cooperative Effort Between Education and Industry. *Gilmer, Maureen.* Spring 1988, 37–40.
Cultural Change. *Schnur, Joel A.* Spring 1988, 3–5.
Design Team Planning for a Successful FMS. *Ewaldz, Donald B.* Summer 1988, 35–39.
Developing a Corporate Charter for CIM. *Sprimont, Thomas E.* Spring 1988, 45–48.
Flexibility for Success in the 1990s. *Schnur, Joel A.* Summer 1990, 3–5.
Focusing Manufacturing Operations. *Osborn, Steve.* Summer 1987, 39–43.

How to Avoid the Worst CIM Planning Traps. *Derks, Richard P.* Fall 1988, 55–60.
The Human Impact of a CIM Decision. *Billo, Richard E., and Paul, Brian K.* Fall 1988, 37–42.
Human Resources Are Key to Improving Productivity. *Unterweger, Peter.* Fall 1988, 29–36.
Implementing Technology Tests a Manufacturer's Competence. *Walleigh, Richard.* Winter 1990, 5–8.
In the Mind's Eye. *Schnur, Joel A.* Fall 1989, 3–5.
The Lessons of Chernobyl, Bhopal, and Three Mile Island. *Unterweger, Peter.* Winter 1990, 60–63.
Management Considerations for Adopting MAP. *Cross, Rice H., III, and Yen, David (Chi-Chung).* Fall 1990, 55–60.
The Management Structure in a CIM Architecture. *Computer Aided Manufacturing-International Inc.* Winter 1989, 39–45.
Messages from an AUTOFACT '88 Study. *Smith, William A., and Michaels, Lawrence T.* Spring 1989, 35–42.
MRP II and Cost Management: A Match Made in Theory? *Anderson, Alan D., and Ostrenga, Michael R.* Summer 1987, 24–28.
Our Quest for Manufacturing Excellence. *Schnur, Joel A.* Winter 1988, 3–6.
Planning Studies Help Senior Management Avoid CIM Pitfalls. *Poliner, Randall E., and Katsoulas, Peter E.* Winter 1988, 20–23.
A Practical Guide for Planning, Designing, and Implementing CIM. *Thacker, Robert M., and Bloodgood, Charles F.* Spring 1988, 49–53.
Roadblocks to CIM Success. *Sibbald, George W.* Spring 1988, 25–36.
Survey of World-Class CIM Planning: Information Architecture First. *Michel, Frederick J., and Pardue, Mark D.* Summer 1990, 17–24.
Survey Shows Priorities Are Quality, Workers, Mature Technologies. *Giffi, Craig A., Roth, Aleda V., and Seal, Gregory M.* Fall 1990, 5–15.
Technical CIM Issues: An Assessment for Management. *Rosenthal, Stephen, and Ward, Peter.* Fall 1985, 42–49.
Value Control in the CIM Environment. *Tietze, Armin R.* Fall 1988, 43–48.

Manufacturing Planning and Control

Can There Be CIM Without MRP II? *Schnur, Joel A.* Summer 1987, 3–6.
A CIM Showcase: Motorola's Bandit Plant. *Sykes, Charles.* Spring 1989, 31–34.
Design Team Planning for a Successful FMS. *Ewaldz, Donald B.* Summer 1988, 35–39.
Determining the True Cost of Material Handling. *Pendlebury, John,* and *Platford, Richard.* Winter 1989, 23–27.
Exploiting Manufacturing Systems' Potential to Improve Cost Management. *Lehman, William M.* Winter 1986, 8–11.
How MRP Can Improve Financial Performance. *Deis, Paul.* Fall 1984, 55–60.
The Importance of Information Systems Analysis for Manufacturing Operations. *Hosseini, Jinoos.* Spring 1989, 43–45.
Integrating CAD and MRP II Systems. *Bohse, Michael E., and Harhalakis, George.* Summer 1987, 7–14.
Japanese Production Planning: A Successful Balancing Act. *McGuire, Kenneth J.* Spring 1985, 59–64.
MADEMA: An Approach to Intelligent Manufacturing Systems. *Chryssolouris, George.* Spring 1987, 11–17.
Main Components of a CIM Reference Model. *Cohen, Gideon.* Winter 1988, 28–36.
Manageable Steps to Factory Automation. *Viola, Michael R.* Spring 1989, 57–59.
Managing the Transition to the Factory of the Future. *Ainsworth, William J., and Freund, York P.* Winter 1988, 24–27.
Manufacturing Resource Planning. *Robert, Eric W.* Fall 1987, 53–54.
Messages from an AUTOFACT '88 Study. *Smith, William A., and Michaels, Lawrence T.* Spring 1989, 35–42.
MRP II and CAD Are a Foundation for CIM Systems. *Harhalakis, George; Mark, Leo; Johri, Anshuman;* and *Cochrane, Bobbie.* Fall 1988, 14–24.
MRP II and Cost Management: A Match Made in Theory? *Anderson, Alan D., and Ostrenga, Michael R.* Summer 1987, 24–28.
MRP II as the Cornerstone of CIM Strategy: Systems Development Corporation Case Study. *Pennente, Ernest A.* Summer 1987, 29–34.
MRP II Futures: Purchasing Strategies. *Keller, Erik.* Winter 1991, 45–47.
MRP II Paves the Road to Computerized Planning Systems. *Richardson, John R.* Winter 1988, 15–19.
MRP II Won't Schedule the Factory of the Future. *Mather, Hal.* Fall 1986, 64–68.
Planning for the CIM Environment. *Sheerer, Cedric.* Winter 1988, 55–59.
A Primer on Quality Function Deployment. *Fortuna, Ronald M.* Fall 1988, 49–54.
Putting ABCs of Information Systems Ahead of CIM. *Shah, Shashi.* Spring 1989, 46–51.
Quality Design Ensures Postmanufacturing Success. *Walsh, Thomas.* Summer 1988, 28–34.
The Role of Coordinate Measuring Machines in Assuring Quality. *Zink, Joseph.* Summer 1988, 22–27.
Standards for Manufacturing Information Models. *Parks, Curtis H.* Fall 1988, 25–28.
Systems for Supporting the MRP II/JIT

Environment. *Rao, Ashok, and Scheraga, David.* Summer 1987, 15–23.
Tracking Factory Dynamics: CIM Systems and Simulation. *Dayhoff, Judith E.* Spring 1987, 47–54.
Value Control in the CIM Environment. *Tietze, Armin R.* Fall 1988, 43–48.
A Vendor's View of MRP II Implementation. *Young, Jan B.* Summer 1987, 50–53.
What's Keeping Industrial Control from Joining the Expert Systems Gold Rush. *Sullivan, Edward.* Spring 1989, 24–30.

Material Handling and Storage
The Architecture of CIM for a Discrete Part Manufacturing Enterprise. *Computer Aided Manufacturing-International Inc.* Fall 1988, 7–13.
Building Flexibility into Automated Material Handling Systems. *Sadowski, Randall P.* Winter 1985, 21–23.
Can AGVs Help to Integrate Your Factory Operations? *Adams, Walter.* Fall 1985, 50–57.
Determining the True Cost of Material Handling. *Pendlebury, John, and Platford, Richard.* Winter 1989, 23–27.
Hark! The Unheralded Computer-Integrated Distribution Function. *Bennett, Earl D.; Reed, Sarah A.; and Shows, William P.* Winter 1989, 28–38.
The Importance of Information Systems Analysis for Manufacturing Operations. *Hosseini, Jinoos.* Spring 1989, 43–45.
Making Hybrid Systems Work. *Tompkins, James A.* Spring 1985, 13–15.
MRP II and CAD Are a Foundation for CIM Systems. *Harhalakis, George; Mark, Leo; Johri, Anshuman; and Cochrane, Bobbie.* Fall 1988, 14–24.
A Plan for Burden Reduction. *Tompkins, James A.* Fall 1984, 22–24.
Putting ABCs of Information Systems Ahead of CIM. *Shah, Shashi.* Spring 1989, 46–51.
Standards for Manufacturing Information Models. *Parks, Curtis H.* Fall 1988, 25–28.
Understanding and Selecting Process Manufacturing Systems . *Thompson, Olin.* Spring 1989, 8–12.
Using Simulation to Upgrade a Warehouse Control System: TI Case Study. *Bradshaw, Wesley W. (Brad).* Winter 1987, 33–41.

Materials Management
Determining the True Cost of Material Handling. *Pendlebury, John, and Platford, Richard.* Winter 1989, 23–27.
The Function and Activity Structure in a CIM Architecture. *Computer Aided Manufacturing-International Inc.* Spring 1989, 52–56.
Hark! The Unheralded Computer-Integrated Distribution Function. *Bennett, Earl D.; Reed, Sarah A.; and Shows, William P.* Winter 1989, 28–38.
The Importance of Systems Analysis for Manufacturing Operations. *Hosseini, Jinoos.* Spring 1989, 43–45.
Logistics Efficiency—Product Design and Process Requirements. *Mather, Hal.* Winter 1986, 16–20.
Manageable Steps to Factory Automation. *Viola, Michael R.* Spring 1989, 57–59.
Managing the Outside Factory. *Mather, Hal.* Winter 1985, 7–12.
MRP II and CAD Are a Foundation for CIM Systems. *Harhalakis, George; Mark, Leo; Johri, Anshuman; and Cochrane, Bobbie.* Fall 1988, 14–24.
A Primer on Quality Function Deployment. *Fortuna, Ronald M.* Fall 1988, 49–54.
Putting ABCs of Information Systems Ahead of CIM. *Shah, Shashi.* Spring 1989, 46–51.
Standards for Manufacturing Information Models. *Parks, Curtis H.* Fall 1988, 25–28.
Understanding and Selecting Process Manufacturing Systems. *Thompson, Olin.* Spring 1989, 8–12.
What's Keeping Industrial Control from Joining the Expert Systems Gold Rush. *Sullivan, Edward.* Spring 1989, 24–30.

Microcomputers
When Microcomputers are Obstacles to Integration. *Tracy, John, and Lucatuorto, Peter.* Spring 1985, 52–58.

Organizational Structures
The Architecture of CIM for a Discrete Part Manufacturing Enterprise. *Computer Aided Manufacturing-International Inc.* Fall 1988, 7–13.
Automated Reasoning to Obtain Flexible Systems Architectures. *Cohen, Gideon.* Winter 1989, 46–56.
A Case Study on Implementing a CIM System: L'eggs Products Inc. *McKenzie, Phillip E.* Spring 1989, 19–23.
CIM Architecture: A Lasting Impression. *Schnur, Joel A.* Fall 1988, 3–6.
CIM Does Not Live by C Alone. *Ayers, James B.* Spring 1990, 45–49.
CIM Requires Bold Leadership. *Schnur, Joel A.* Spring 1989, 3–7.
A CIM Showcase: Motorola's Bandit Plant. *Sykes, Charles.* Spring 1989, 31–34.
Customizing Shops. *Appleton, Daniel S.* Summer 1985, 3–7.
Focusing Manufacturing Operations. *Osborne, Steve.* Summer 1987, 39–43.
The Function and Activity Structure in a CIM Architecture. *Computer Aided Manufacturing-International Inc.* Spring 1989, 52-56.

The Management Structure in a CIM Architecture. *Computer Aided Manufacturing-International Inc.* Winter 1989, 39–45.
Opening Windows of Opportunity. *Savage, Charles M.* Fall 1984, 12–16.
Renovating the Organizational Architecture. *Savage, Charles.* Spring 1985, 8–12.
Standards for Manufacturing Information Models. *Parks, Curtis H.* Fall 1988, 25–28.
Survey of World-Class CIM Planning: Information Architecture First. *Michel, Frederick J., and Pardue, Mark D.* Summer 1990, 17–24.
A User's Perspective on CAD/CAM and MIS Integration. *Van Nostrand, Ronald.* Winter 1986, 38–45.

Performance Measurements

Are Factory Performance Measures the Cause of Poor Productivity? *Sadowski, Randall P.* Fall 1984, 17–21.
A Case Study on Implementing a CIM System: L'eggs Products Inc. *McKenzie, Phillip E.* Spring 1989, 19–23.
The Challenge and the Rewards. *Michel, Frederick J.* Winter 1989, 57–61.
A Clash of Cultures. *Schlie, Theodore W.* Spring 1988, 18–22.
Determining the True Cost of Material Handling. *Pendlebury, John, and Platford, Richard.* Winter 1989, 23–27.
Experience Curve Theory: A Technique for Quantifying CIM Benefits. *Baudin, Michel.* Summer 1985, 51–58.
Human Resources Are Key to Improving Productivity. *Unterweger, Peter.* Fall 1988, 29–36.
The Importance of Information Systems Analysis for Manufacturing Operations. *Hosseini, Jinoos.* Spring 1989, 43–45.
Messages from an AUTOFACT '88 Study. *Smith, William A., and Michaels, Lawrence T.* Spring 1989, 35–42.
MRP II and Cost Management: A Match Made in Theory? *Anderson, Alan D., and Ostrenga, Michael R.* Summer 1987, 24–28.
Past, Present, and Future. *Mittelstadt, Eric.* Spring 1989, 60–62.
The Payoff of CIM. *Rasmussen, Arne P.* Winter 1989, 62–64.
Performance Measurement and Cost Management: Labor's Loss or Management's Gain? *Muir, William T.* Winter 1987, 56–60.
Production Monitoring. *Russell, D.W.* Fall 1989, 50–57.
Profiting Through Producibility. *Schnur, Joel A.* Winter 1989, 3–7.
What's Keeping Industrial Control from Joining the Expert Systems Gold Rush. *Sullivan, Edward.* Spring 1989, 24–30.

Product Design and Process Optimization

A Case Study on Implementing a CIM System: L'eggs Products Inc. *McKenzie, Phillip E.* Spring 1989, 19–23.
The Concurrent Engineering Parade. *Schnur, Joel A.* Winter 1991, 3–4.
Design for Manufacturability Makes Dollars and Sense. *Dwivedi, Suren N., and Klein, Barry R.* Spring 1986, 53–59.
Designing for Manufacturability: Multifunctional Teams at Hewlett-Packard. *Hiatt, Dale.* Summer 1990, 63–65.
The Hewlett-Packard Deskjet: Flexible Assembly and Design for Manufacturability. *Freeman, Brad.* Fall 1990, 50–54.
The Importance of Information Systems Analysis for Manufacturing Operations. *Hosseini, Jinoos.* Spring 1989, 43–45.
Manufacturing Part Features: CIM's Technological Common Denominator. *Atkinson, Andrews.* Winter 1990, 34–42.
A Primer on Quality Function Deployment. *Fortuna, Ronald M.* Fall 1988, 49–54.
Timken's New Process-Control System: Improving Productivity and Quality. *Ross, John D.* Summer 1990, 42–44.

Production Control

Are Factory Performance Measures the Cause of Poor Productivity? *Sadowski, Randall P.* Fall 1984, 17–21.
The Challenge and the Rewards. *Michel, Frederick J.* Winter 1989, 57–61.
Determining the True Cost of Material Handling. *Pendlebury, John, and Platford, Richard.* Winter 1989, 23–27.
The Importance of Information Systems Analysis for Manufacturing Operations. *Hosseini, Jinoos.* Spring 1989, 43–45.
Improving Automated Systems Scheduling. *Sadowski, Randall.* Fall 1985, 10–13.
A Primer on Quality Function Deployment. *Fortuna, Ronald M.* Fall 1988, 49–54.
Profiting Through Producibility. *Schnur, Joel A.* Winter 1989, 3–7.
What's Keeping Industrial Control from Joining the Expert Systems Gold Rush. *Sullivan, Edward.* Spring 1989, 24–30.

Quality

Accounting for Quality Costs—A Critical Component of CIM. *Morse, Wayne J., and Poston, Kay.* Fall 1986, 53–60.
Assessing the Feasibility of an Automated Testing System: A Case Study. *Fox, Herbert, and Weiner, Joel.* Spring 1986, 41–52.

Assuring the Quality of Automation Equipment. *Joyner, William E.* Summer 1988, 19–21.
Developing a Quality CIM Operation. *Sullivan, Michael J.* Summer 1988, 3–5.
Evaluating Quality Software. *Kolinka, Edward P.* Spring 1987, 61–64.
A Fully Automated System for Electronic Assembly and Testing. *Dwivedi, Suren N., and Kupic, Joseph.* Summer 1986, 14–25.
Hark! The Unheralded Computer-Integrated Distribution Function. *Bennett, Earl D.; Reed, Sarah A.; and Shows, William P.* Winter 1989, 28–38.
A History Lesson: Finding the Fast Track to Better Quality. *Keane, John.* Fall 1985, 19–21.
The Importance of Information Systems Analysis for Manufacturing Operations. *Hosseini, Jinoos.* Spring 1989, 43–45.
Installing the Quality Information Management System. *Keane, John A.* Fall 1987, 55–59.
The Payoff of CIM. *Rasmussen, Arne P.* Winter 1989, 62–64.
A Primer on Quality Function Deployment. *Fortuna, Ronald M.* Fall 1988, 49–54.
Proving That Quality Pays. *Keane, John A.* Winter 1986, 12–15.
Quality by Integration. *Monger, Rod F.* Fall 1990, 61–64.
Quality Design Ensures Postmanufacturing Success. *Walsh, Thomas J.* Summer 1988, 28–34.
Quality Information in Manufacturing: Distributed Processing and Manufacturing Cells. *Hohner, Gregory.* Summer 1990, 25–29.
Reviving Global Consumers' Regard for Made in USA. *Schnur, Joel A.* Winter 1990, 3–4.
ROI for Quality Systems. *Keane, John A.* Summer 1986, 59–63.
The Role of Coordinate Measuring Machines in Assuring Quality. *Zink, Joseph.* Summer 1988, 22–27.
The Struggle for Integration. *Costea, Ileana.* Winter 1990, 9–14.
Survey Shows Priorities Are Quality, Workers, Mature Technologies. *Giffi, Craig A.; Roth, Aleda V.; and Seal, Gregory M.* Fall 1990, 5–15.
Using SPC to Become a Quality Manufacturer. *Borden, James.* Summer 1988, 6–18.

Robotics

Do Industrial Robots Have a Place in Your Company? *Villers, Philippe.* Winter 1985, 29–40.
Emerging Technologies in Robotics. *Odrey, Nicholas G., and Groover, Mikell P.* Summer 1989, 3–8.
The Evolution of CAD/CAM in Canada. *Scrimgeour, Jack.* Fall 1987, 48–52.
A Fully Automated System for Electronic Assembly and Testing. *Dwivedi, Suren N., and Kupic, Joseph.* Summer 1986, 14–25.
The Future of Robotics in Manufacturing. *Attaran, Mohsen.* Summer 1989, 9–15.
Improving and Measuring Robot Process Capability. *Jiang, Bernard C., and Black, J.T.* Summer 1987, 44–49.
Laser-Based Robotic Systems for Manufacturing Automation. *Ray, Asok, and Watson, Henry.* Summer 1988, 40–46.
New Standards for Industrial Robot Safety. *Lauck, Kenneth E.* Spring 1986, 60–68.
A Progress Report on Robot Programming. *Odrey, Nicholas G., and Nagel, Roger N.* Summer 1985, 23–26.
To Verify Robot Software, Look at Manufacturing Context. *Troxell, Wade O.* Spring 1990, 22–29.
What Lies Below the Tip of the Iceberg? *Nagel, Roger N.* Fall 1984, 30–34.

Shop Floor Control

A Case Study of Shop Floor System Evolution. *Best, James D.* Summer 1985, 36–44.
A Case Study on Integrating Job Redesign and CIM: International BioSynthetics Inc. *Hettenhaus, James R.* Spring 1989, 13–18.
Determining the True Cost of Material Handling. *Pendlebury, John, and Platford, Richard.* Winter 1989, 23–27.
The Function and Activity Structure in a CIM Architecture. *Computer Aided Manufacturing-International Inc.* Spring 1989, 52–56.
Hark! The Unheralded Computer-Integrated Distribution Function. *Bennett, Earl D.; Reed, Sarah A.; and Shows, William P.* Winter 1989, 28–38.
The Human Impact of the CIM Decision. *Billo, Richard E., and Paul, Brian K.* Fall 1988, 37–42.
Human Resources Are Key to Improving Productivity. *Unterweger, Peter.* Fall 1988, 29–36.
The Importance of Information Systems Analysis for Manufacturing Operations. *Hosseini, Jinoos.* Spring 1989, 43–45.
Integrating Automated Systems Control and Design. *Harmonosky, Catherine.* Spring 1986, 16–20.
Manageable Steps to Factory Automation. *Viola, Michael R.* Spring 1989, 57–59.
A Primer on Quality Function Deployment. *Fortuna, Ronald M.* Fall 1988, 49–54.
What's Keeping Industrial Control from Joining the Expert Systems Gold Rush. *Sullivan, Edward.* Spring 1989, 24–30.

Simulation and Modeling

Low-Cost Artificial Intelligence Can Aid Design and Simulation. *Mackulak, Gerald, and Cochran, Jeffrey.* Spring 1987, 33–36.
Making the Most of IDEF Modeling—The Triple Diagonal Concept. *Shunk, Daniel L.; Sullivan,*

William G.; and Cahill, Jerry. Fall 1986, 12–17.
Modeling Manufacturing with Petri Nets. *Srihari, K.; Emerson, Robert C.; and Cecil, Joe Amal.* Spring 1990, 15–21.
MRP II and CAD Are a Foundation for CIM Systems. *Harhalakis, George; Mark, Leo; Johri, Anshuman; and Cochrane, Bobbie.* Fall 1988, 14–24.
New Techniques for Simulation Modeling and Analysis. *Dayhoff, Judith E.* Winter 1987, 18–24.
Physical Simulation for Software System Development. *Deisenroth, Michael P.* Spring 1987, 55–58.
Rough-Cut Modeling: An Alternative to Simulation. *Suri, Rajan, and Diehl, Gregory W.* Winter 1987, 25–32.
Selecting a Manufacturing Simulations System. *Deaver, Richard A.* Winter 1987, 6–8.
Simulation-Based Planning, Scheduling, and Control of Job Shops. *Marcus, Robert.* Fall 1990, 44–49.
Simulation Modeling Perspectives: The World View. *Pritsker, A. Alan B.* Winter 1987, 9–17.
Standards for Manufacturing Information Models. *Parks, Curtis H.* Fall 1988, 25–28.

Standards
Automated Reasoning to Obtain Flexible Systems Architectures. *Cohen, Gideon.* Winter 1989, 46–56.
How to Wait for CIM Communication Standards. *McCarthy, J.J.* Spring 1990, 38–40.
Management Considerations for Adopting MAP. *Cross, Rice H., III, and Yen, David (Chi-Chung).* Fall 1990, 55–60.
Standards for Manufacturing Information Models. *Parks, Curtis H.* Fall 1988, 25–28.
A Standards Framework for the Computer-Integrated Enterprise. *Gibbons, Albert J.* Spring 1988, 10–17.
The State of IBM's CIM Architecture. *Munsinger, John P.* Spring 1990, 30–33.

Strategic Planning
Beyond CIM: Optimized Manufacturing. *Hess, George J.* Summer 1990, 6–16.
A Case Study on Implementing a CIM System: L'eggs Products Inc. *McKenzie, Phillip E.* Spring 1989, 19–23.
The Challenge and the Rewards. *Michel, Frederick J.* Winter 1989, 57–61.
CIM Architecture: A Lasting Impression. *Schnur, Joel A.* Fall 1988, 3–6.
CIM Dictates Changes in Management Practice. *Gold, Bela.* Spring 1986, 3–6.
CIM from a Top Management Perspective. *Weston, F.C., Jr.* Winter 1989, 18–22.
CIM Planning: The Future-Factory Foundation. *Quantz, Paul.* Fall 1984, 38–44.
CIM—A Program, Not a Project. *Appleton, Daniel S.* Winter 1985, 3–6.
CIM Requires Bold Leadership. *Schnur, Joel A.* Spring 1989, 3–7.
Computer Technology: The Next Revolution. *Joseph, Earl C.* Summer 1986, 49–54.
Determining the True Cost of Material Handling. *Pendlebury, John, and Platford, Richard.* Winter 1989, 23–27.
Dispelling Myths About CIM Planning and Implementation. *Shunk, Dan L.* Winter 1985, 24–28.
The Elements of CIM: The Role of Information. *Gibbons, Albert J.* Winter 1989, 8–17.
Executive Checklist: Are You Ready for CIM? *Bonsack, Robert.* Summer 1987, 35–38.
Focusing Manufacturing Operations. *Osborn, Steve.* Summer 1987, 39–43.
Guidelines for Implementing Global Manufacturing Systems. *Gopal, Christopher.* Fall 1986, 25–33.
How to Avoid the Worst CIM Planning Traps. *Derks, Richard P.* Fall 1988, 55–60.
The Human Impact of the CIM Decision. *Billo, Richard E., and Paul, Brian K.* Fall 1988, 37–42.
Impediments to CIM Implementation. *Merchant, M. Euguene.* Fall 1984, 6–11.
International Standards—An Evolutionary Process for a Revolutionary Field. *Kozikowski, Walter.* Summer 1986, 6–13.
Making the Most of IDEF Modeling —The Triple Diagnonal Concept. *Shunk, Daniel; Sullivan, William G.; and Cahill, Jerry.* Fall 1986, 12–17.
Manageable Steps to Factory Automation. *Viola, Michael R.* Spring 1989, 57–59.
The Management Structure in a CIM Architecture. *Computer Aided Manufacturing-International Inc.* Winter 1989, 39–45.
Manufacturing Strategic Planning: Key to Competitive Strength. *Stahl, John F.* Fall 1989, 14–20.
Merging Strategy with Operations. *Romano, Joseph.* Fall 1985, 22–24.
Messages from an AUTOFACT '88 Study. *Smith, William A., and Michaels, Lawrence T.* Spring 1989, 35–42.
MRP II as the Cornerstone of CIM Strategy: Systems Development Corporation Case Study. *Pennente, Ernest A.* Summer 1987, 29–34.
Opening Windows of Opportunity. *Savage, Charles M.* Fall 1984, 12–16.
A Path to Successful Factory Automation. *Thamhain, Hans J., and Beicke, Kenneth.* Fall 1986, 5–11.
People: The Primary Resource in World-Class Manufacturing. *Gunn, Thomas G.* Spring 1988, 6–9.
The Phase Review Methodology: A Planning Approach for CIM. *Cabibi, Bradford J.; Klein,*

Barry R.; and Lynes, C. Daniel. Winter 1987, 42–47.
Planning Studies Help Senior Management Avoid CIM Pitfalls. *Poliner, Randall F., and Katsoulas, Peter E.* Winter 1988, 20–23.
A Practical Guide for Planning, Designing and Implementing CIM. *Thacker, Robert M., and Bloodgood, Charles F.* Spring 1988, 49–53.
A Primer on Quality Function Deployment. *Fortuna, Ronald M.* Fall 1988, 49–54.
Process Planning in the Computer-Integrated Factory. *Tulkoff, Joseph.* Fall 1987, 24–27.
A Proven Approach to CIM Systems Design and Planning. *Lapen, Robert J., and Jeffrey, Robert J.* Summer 1986, 36–48.
Putting ABCs of Information Systems Ahead of CIM. *Shah, Shashi.* Spring 1989, 46–51.
Stimulation Through Simulation. *Schnur, Joel A.* Winter 1987, 3–5.
Survey Analysis: Automation Plans and Problems. *Kozibowski, Walter.* Fall 1985, 30–35.
Survey of World-Class CIM Planning: Information Architecture First. *Michel, Frederick J., and Pardue, Mark D.* Summer 1990, 17–24.
Tracking Factory Dynamics: CIM Systems and Simulations. *Dayhoff, Judith E.* Spring 1987, 47–54.
Using Simulation to Upgrade a Warehouse Control System. *Bradshaw, Wesley W.* Winter 1987, 33–41.
Value Control in the CIM Environment. *Tietze, Armin R.* Fall 1988, 43–48.
Why Strategy Drives Integration. *Bennett, Earl D.; Fossums, Barbara M.; Harris, Roy D.; Reed, Sarah A.; and Skipper, J. Franklin.* Winter 1990, 15–22.

Systems Architecture

The Architecture of CIM for a Discrete Part Manufacturing Enterprise. *Computer Aided Manufacturing-International Inc.* Fall 1988, 7–13.
Automated Reasoning to Obtain Flexible Systems Architectures. *Cohen, Gideon.* Winter 1989, 46–56.
CIM Architecture: A Lasting Impression. *Schnur, Joel A.* Fall 1988, 3–6.
Critical Issues in Integrating Factory Automation Systems. *Odrey, Nicholas, and Nagel, Roger.* Winter 1986, 29–37.
The Function and Activity Structure in a CIM Architecture. *Computer Aided Manufacturing-International Inc.* Spring 1989, 52–56.
How to Avoid the Worst CIM Planning Traps. *Derks, Richard P.* Fall 1988, 55–60.
Low-Cost Factory Systems Integration. *Caldwell, Laura M.* Summer 1985, 27–35.
Making the Most of IDEF Modeling—The Triple Diagonal Concept. *Shunk, Daniel; Sullivan, William G.; and Cahill, Jerry.* Fall 1986, 12–17.
The Management Structure in a CIM Architecture. *Computer Aided Manufacturing-International Inc.* Winter 1989, 39–45.
MRP II and CAD Are a Foundation for CIM Systems. *Harhalakis, George; Mark, Leo; Johri, Anshuman; and Cochrane, Bobbie.* Fall 1988, 14–24.
Object-Oriented Programming: A New Approach for Automatic Factories. *Taylor, William A.* Summer 1986, 55–58.
The State of IBM's CIM Architecture. *Munsinger, John P.* Spring 1990, 30–33.
Survey of World-Class CIM Planning: Information Architecture First. *Michel, Frederick J., and Pardue, Mark D.* Summer 1990, 17–24.
Technical CIM Issues: An Assessment for Management. *Rosenthal, Stephen, and Ward, Peter.* Fall 1985, 42–49.

Systems Integration

Automated Reasoning to Obtain Flexible Systems Architectures. *Cohen, Gideon.* Winter 1989, 46–56.
Beyond CIM: Computer-Optimized Manufacturing. *Hess, George J.* Summer 1990, 6–16.
A Case Study in Software Systems Integration. *Chappell, Terry.* Spring 1985, 45–51.
Hark! The Unheralded Computer-Integrated Distribution Function. *Bennett, Earl D.; Reed, Sarah A.; and Shows, William P.* Winter 1989, 28–38.
Integrated Systems Play a Leading Role in Chrysler's Comeback. *Seigel, Michael H.* Fall 1986, 61–63.
Integrating CAD and MRP II Systems. *Bohse, Michael E., and Harhalakis, George.* Summer 1987, 7–14.
Low-Cost Factory Systems Integration. *Caldwell, Laura M.* Summer 1985, 27–35.
Making the Most of IDEF Modeling—The Triple Diagonal Concept. *Shunk, Daniel L.; Sullivan, William G.; and Cahill, Jerry.* Fall 1986, 12–17.
Managing Bill of Material and CAD/CAM Data. *Schmuland, Rodney.* Winter 1986, 46–54.
Managing the Transition to the Factory of the Future. *Ainsworth, William J., and Freund, York P.* Winter 1988, 24–27.
MRP II and CAD Are a Foundation for CIM Systems. *Harhalakis, George; Mark, Leo; Johri, Anshuman; and Cochrane, Bobbie.* Fall 1988, 14–24.
MRP II as the Cornerstone of CIM Strategy: Systems Development Corporation Case Study. *Pennente, Ernest A.* Summer 1987, 29–34.
Standards for Manufacturing Information Models. *Parks, Curtis H.* Fall 1988, 24–28.
A User's Perspective on CAD/CAM and MIS Integration. *Van Nostrand, Ronald.* Winter 1986, 38–45.

Tooling Design and Management

Automated Reasoning to Obtain Flexible Systems Architectures. *Cohen, Gideon.* Winter 1989, 46–56.

Determining the True Cost of Material Handling. *Pendlebury, John, and Platford, Richard.* Winter 1989, 23–27.

Flexible Fixturing Capabilities Support CIM Operations. *Thompson, Brian, and Gandhi, Mukesh.* Fall 1985, 36–41.

Hark! The Unheralded Computer-Integrated Distribution Function. *Bennett, Earl D.; Reed, Sarah A.; and Shows, William P.* Winter 1989, 28–38.

The Importance of Information Systems Analysis for Manufacturing Operations. *Hosseini, Jinoos.* Spring 1989, 43–45.

Integration Through Simplification: Rethinking Plan Layout and Machine Changeover. *Mather, Hal.* Summer 1985, 13–17.

MRP II and CAD Are a Foundation for CIM Systems. *Harhalakis, George; Mark, Leo; Johri, Anshuman; and Cochrane, Bobbie.* Fall 1988, 14–24.

A Primer on Quality Function Deployment. *Fortuna, Ronald M.* Fall 1988, 49–54.

Standards for Manufacturing Information Models. *Parks, Curtis H.* Fall 1988, 25–28.

Training and Education

A Case Study on Integrating Job Redesign and CIM: International BioSynthetics Inc. *Hettenhaus, James R.* Spring 1989, 13–16.

CIM Requires Bold Leadership. *Schnur, Joel A.* Spring 1989, 3–7.

A Cooperative Effort Between Education and Industry. *Gilmer, Maureen.* Spring 1988, 37–40.

Educational Imperatives for CIM. *Merchant, Eugene.* Fall 1985, 14–18.

Getting Started with Expert Systems. *Colgrove, Dean W.* Spring 1987, 29–32.

How to Avoid the Worst CIM Planning Traps. *Derks, Richard P.* Fall 1988, 55–60.

The Human Impact of the CIM Decision. *Billo, Richard E,. and Paul, Brian K.* Fall 1988, 37–42.

Human-Integrated Manufacturing. *Sage, Lee, and Fox, Bob.* Spring 1990, 41–44.

Human Resources Are Key to Improving Productivity. *Unterweger, Peter.* Fall 1988, 29–36.

Impediments to CIM Implementation. *Merchant, M. Eugene.* Fall 1984, 6–11.

The Management Structure in a CIM Architecture. *Computer Aided Manufacturing-International Inc.* Winter 1989, 39–45.

People: The Primary Resource in World-Class Manufacturing. *Gunn, Thomas G.* Spring 1988, 6–9.

Survey Analysis: Automation Plans and Problems. *Kozikowski, Walter.* Fall 1985, 30–35.

Survey Shows Priorities Are Quality, Workers, Mature Technologies. *Giffi, Craig A.; Roth, Aleda V.; and Seal, Gregory M.* Fall 1990, 5–15.

User Interfaces

Bringing Image Processing into Focus. *Moody, Gerald H.* Summer 1986, 26–28.

A Case Study on Integrating Job Redesign and CIM: International BioSynthetics Inc. *Hettenhaus, James R.* Spring 1989, 13–18.

The Human Impact of the CIM Decision. *Billo, Richard E., and Paul, Brian K.* Fall 1988, 37–42.

Human Resources Are Key to Improving Productivity. *Unterweger, Peter.* Fall 1988, 29–36.

Messages from an AUTOFACT '88 Study. *Smith, William A., and Michaels, Lawrence T.* Spring 1989, 35–42.

MRP II and CAD Are a Foundation for CIM Systems. *Harhalakis, George; Mark, Leo; Johri, Anshuman; and Cochrane, Bobbie.* Fall 1988, 14–24.

The Role of User Groups In Understanding CIM's Capabilities. *Russo, Rosemary.* Winter 1988, 46–52.

Speech Input/Output: Support for Integration. *Watrous, Raymond.* Spring 1985, 37–44.

Standards for Manufacturing Information Models. *Parks, Curtis H.* Fall 1988, 25–28.

Understanding and Selecting Process Manufacturing Systems. *Thompson, Olin.* Spring 1989, 8–12.

Vendor Relationships

CIM from a Top Management Perspective. *Weston, F.C., Jr.* Winter 1989, 18–22.

Customer-Supplier Relationships for Just in Time. *O'Neal, Charles.* Spring 1986, 33–40.

Determining the True Cost of Material Handling. *Pendlebury, John, and Platford, Richard.* Winter 1989, 23–27.

Managing the Outside Factory. *Mather, Hal.* Winter 1985, 7–12.

Value Control in the CIM Environment. *Tietze, Armin R.* Fall 1988, 43–48.

A Vendor's View of MRP II Implementation. *Young, Jan B.* Summer 1987, 50–53.

What's Keeping Industrial Control from Joining the Expert Systems Gold Rush. *Sullivan, Edward.* Spring 1989, 24–30.
